

CLEAN VERSION OF AMENDMENTS

IN THE CLAIMS

Please amend claims 10, 21, and add new claims 35 through 40, to read as follows:

10. (Amended) The apparatus of claim 1, further comprising a third unit accommodating
said back wall, said third unit, comprising:

a first portion forming an enclosure with a chamber, said back wall having said bottom side
connected to an internal portion of said first portion within the chamber; and

a flap formed from a side of said first portion closing an opening to the chamber of said first
portion, the first unit capable of hanging on an object outside of said first portion when said flap
uncovers said first portion and said back wall is lifted out of the chamber.

21. (Amended) The apparatus of claim 15, with said back wall being set back a certain
distance from an edge of the side walls.

35. A bag, comprising:

a back wall;

a left wall and right wall extending from at least a portion of said back wall;

a bottom portion formed from a bottom of said back wall and connecting a bottom of said
right wall to said left wall;

a first wall extending from said bottom portion and assisting in holding at least a portion of
said left and right walls together to form a chamber;

8 a plurality of compartments on a front surface of said back wall, said plurality of
9 compartments comprising a front portion comprising of at least a partially see-through material
10 accommodating a circulation of air within said compartments, said compartments accommodating
11 a plurality of objects, said plurality of compartments being disposed on a single plane
12 accommodating full accessibility and a view of the objects within said plurality of compartments
13 when in an open position, said back wall folding to close said bag, said compartments disposed from
14 a top portion of the front surface of said back wall to a bottom portion of said back wall; and
15 at least one strap disposed on the back surface of said back wall to accommodate a transport
16 of said bag.

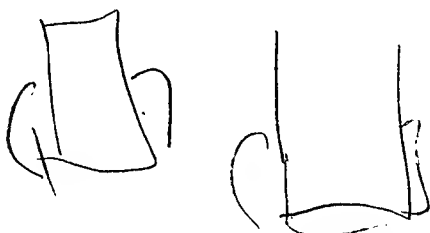

1 --36. The bag of claim 35, with said at least one strap being a backpack strap accommodating
2 the transport of said bag on a back of a user.

1 --37. The bag of claim 36, further comprising a first unit connected to a top side of said back
2 wall, said first unit capable of hanging said back wall in the single plane to an external object.

1 --38. The bag of claim 37, further comprising a first unit accommodating the hanging of
2 garments along a length of said back wall.

1 --39. A backpack, comprising:

2 a back member having a top, bottom and two sides;
3 curved side members affixed to each of said two sides of said back member and extending

4 from a front side of said back member;

5 a bottom member connected to said bottom of said back member and each of said curved side
6 members, said bottom member extending from said front side of said back member, said back
7 member, said curved side members and said bottom member defining an internal volume;

8 a zipper positioned on said top of said back member and on said curved side members and
9 said bottom member for selectively connecting and disconnecting said top of said back member to
10 said curved side members and said bottom member;

3
a 11 a plurality of compartments formed on a front side of said back member at spaced apart
12 locations, said compartments being within said internal volume when said zipper connects said top
13 of said back member to said curved side member, said back member forming a single plane when
14 in an opened position to accommodate an access and view of objects within said plurality of
15 compartments; and

16 backpack straps positioned on a back side of said back member.

1 --40. The backpack of claim 39, further comprising a hook connected to said back member
2 for hanging said back member when said zipper is selectively disconnected with said top of said back
3 member from said curved side members and said bottom member.
